A Very Coherent and Authentic Album

In a time when artificial intelligence is ubiquitous, Palypso remains authentic. She prefers to do everything herself: composing, playing beats, keyboards, violin, viola, saxophone, singing, and producing her debut album independently. "The album 'Worst Cake Scenarios' is an emotional journey through the highs and lows of life, captured in a harmonious balance of calm and dynamism," explains Palypso.

An Album Full of Complexity and Sophistication

Palypso's music reflects themes such as resilience, love, and letting go. Her new album, with its meaningful lyrics and positive energy, is now available on Bandcamp, Spotify, and all major streaming platforms.

A Sonic Journey through the Highs and Lows of Life

'Worst Cake Scenarios' captures the essence of life in all its facets. From the heights of love to the depths of letting go, every note is infused with deep emotional resonance. "My music creates a space where shadows are also allowed to exist and captures the essence of the constant flow of existence, the power of love, and the light within us," says Palypso.

The Concept of the Album

'Worst Cake Scenarios' shows that even in chaos, beauty and joy can be found. A cake that falls on the floor can still be eaten with love and enjoyment. This idea is reflected throughout the album. A few years ago, the question came up, "What would my sound, my music sound like if I made no compromises? While playing with other people, you always compromise, which is also beautiful because you create together." I bought a looping station and started experimenting with beats, sounds, and instruments. Out of these improvisations was born the album 'Worst Cake Scenarios'.

About Palypso

My name is Tanja Palu, my artist name is Palypso. Palypso is a combination of Palu and Calypso – Calypso stands for the connection with the sea. I grew up in Helsinki and feel strongly connected to the sea. I am a Finnish-French multi-instrumentalist, composer, and singer. I started playing the violin at the age of 6 and began performing publicly a few years later. Along came the piano, saxophone, and singing, and my musical spectrum expanded to jazz, electro, world music, folk music, improvisation... Studying classical violin brought me to Vienna, which has been my home ever since. Music has been part of my life since my childhood. Making music is like breathing; I can't imagine my life without it. Making music is an endless journey where you get to know yourself and others, meet people, grow, find new ways to cope with the world, to love and to live. Creating music happens somewhere between consciousness and unconsciousness; when you are in a state of flow, you tap into the energies of the universe and become a channel.
